2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

H9. Is anyone in your household currently covered by individual health insurance bought directly from an insurer?

H9a. Some insurance companies sell policies that cover specific diseases such as cancer or stroke but do not cover you if you are sick with anything else. Does this privately purchased policy only cover your medical expenses for a specific disease or is it a general health plan?

H9b. Some insurance companies sell plans that are not insurance but instead offer you a discount on certain services such as pharmacy services or doctors visits. Does this sound like the policy you purchased?

<i>ALL PERSONS</i>	<i>NO</i>	<i>FULL POLICY</i>	<i>LIMITED POLICY</i>	<i>NUMBER OF RESPONDENTS</i>

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

D3A. Please tell me – in your own words – why you (TARGET) would not enroll?

RECORD VERBATIM

There are always strings attached to the insurance.

We live in a Hutterite Colony. Our Colony does not have insurance.

Who would be paying for it, nothing is free, it would probably come out of taxes.

I do not believe in welfare. If I am able to work, I am able to pay for everything that I own.

Scared to do so, really nothing is free.

Public programs support abortion and require people to do it without choice, it is socialism.

Leaving the country, do not need it.

Have to be no cost.

Government is corrupt.

May get in trouble with Medicaid.

Government cannot run anything. Not willing to mortgage great grandchildren's' future on the government bailing me out. Government cannot run a program, know government workers and they do not know anything.

Not at this time. If it is a socialistic form of governmental control I do not want to be a part of it.

Would want to know more about it.

I would investigate first before I decided.

I do not believe in Government Assistance because I do not find it morally or ethically correct, because if I cannot afford it, than the State or Federal Government should not be paying for it.

Self-insured, not going to be a burden on fellow Montanans. Nothing is free.

Depends on who would pay for it, especially if tax payers are paying for it.

I do not want the government involved in my life.

Will shortly be on Medicare.

We think that Government is too involved with everyday life for the citizens of this country.

I am on Medicaid.

Check it out first.

It is a political situation; it is socialism in a communistic manner. The healthcare that Obama is trying to push is completely unconstitutional, and reminds us of Stalin's Communistic Russia. It failed in Russia miserably and I believe that it will do the same here. Failed every single time it has been tried. Being forced to enter a contract without consent and full knowledge. People have to enter knowingly, voluntarily, intentionally.

Would check it out.

Do not think it is government business to provide insurance.

I am not a fan of health insurance and not having a say in what is paid for and what is not. I am part of a health care sharing ministry that is health coverage but not insurance.

Do not want to know about it, if I knew about how sick I was I would have to get insurance.

I already have insurance.

Pride.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

I would not be eligible to enroll.

Depends on conditions.

Would check it out first.

Depends on the plan, health care is not a big worry for me.

I do not get sick and there is no reason to go to a doctor. The only thing I want is dental and optical. Why pay for something I will not use.

Would depend on the policy.

Systems are available to the persons who need it most, and we should focus on those who need it most first.

I would not go on Medicaid, Medicare, or any of it. I am a Republican.

We think everyone should be responsible for their own.

He is pretty stubborn sometimes.

Would as long as I was not bumming off tax payers, do not want to be a welfare bum, pride.

Learn about it first.

It is debatable.

Check credibility, research all purchases.

I am covered pretty well under Indian Health Service.

Able to pay for insurance at moment, just have not found right type, and think that people on public programs should be paying into it rather than just accepting a hand out.

Depends on the coverage.

He gets coverage thru the Veterans Administration right now, if that changed, then he would.

Starting a new job in a few weeks that has health insurance.

He is covered through his work. They do not supply the whole thing, but we pay in 200 dollars a month.

It's our taxes. We have the children covered but probably not us. It's a cost to us through taxes.

Has Medicare, poor, broke, and no time.

We cannot afford health care.

Country is giving away money, we pay taxes, and I pay for it anyway, and people on Medicaid think they get something for nothing.

I am a facts type of a person; I just would need to see all of the numbers first.

Out of dignity for ourselves, want to be more responsible for our own care.

I rely on prayer for healing.

Do not want to take money from the government. Can take care of ourselves.

Depends on rules and regulations, one hospital one doctor will not do.

Not a need.

Not able to afford.

I will wait for Medicare in January.

See if costs more than my Medicaid because it would cost tax payers more, so I would have to see the costs.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Depends on what is covered and that sort of thing.

Depends on how program is funded.

Cost.

Cannot afford it.

I have not needed it in the past.

It is a personal, religious belief.

Have to see what it would consist of. My Medicaid would be at risk.

Completely covered by tribal health, so there is no reason to enroll.

I do not want somebody else paying for my health care.

Depends on what covered.

There would be strings attached to it, and I do not trust anyone anymore.

Kind of coverage would be the deciding factor.

We do not want Obama care.

Would not need to.

There is someone who needs it worse than I do.

Would depend on how you could qualify.

See what kind of coverage it was.

Not paying for it.

I do not want them to have full control of what I do and do not do.

I use alternative medicine.

We do not want to be dependent on the Government.

Depends on if he could see his family doctor.

Came from England so used to health care being provided, but not sure how it would be presented here.

I do not want to take advantage of the government.

We have red white and blue Medicare that will start in January.

Do not believe in taking for free unless we cannot pay the bill.

Afraid what it might lead to. Do not like what he is trying to jam down our throats.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

D9. I'm going to read you two statements. Please tell me which best applies to you (target).

Some people could have health insurance but CHOOSE not to because they are healthy and would like to spend their money on other things that are not absolutely needed to live.

Other people MUST use all of the money they have for absolutely necessary things like food, clothing, and housing instead of health insurance.

ADULTS 18-64 YEARS OF AGE WITH UNINSURED EXPERIENCE IN LAST 12 MONTHS	NO	YES	DK	NUMBER OF RESPONDENTS

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

C9a. Please tell me more about why it is like this for you (target).

RECORD VERBATUM.

He does not make enough money to get insurance.

Displaced homemaker at the moment.

We do not have the extra money.

He is self-employed and he does not know his income for the future. He is healthy but he would like to have it.

Both working and just trying to pay bills, we cannot afford out of pocket for health insurance without a group rate.

Living is not living if you are not paying the bills. You should have fun but I do not believe in a frivolous life. You should hold some responsibility. Life is too expensive to just buck down and pay anything. Social Democratic Lifestyle with a Philosophy.

He is unemployed right now and money we do have goes to necessary items.

Currently unemployed.

We do not make a whole lot of money; our money goes towards bills and living expenses.

Kids are important and my house payment is important and no extra money to put toward anything else.

Spend our money on our bills.

I was in a wreck and I have been out of work for two years, I am disabled for life and money that I may get goes to living expenses.

Money, employer does not provide and do not make enough to buy for self.

Could not afford healthcare through work anymore.

Have to use all funds for living expense because has custody of grandson.

Not enough money coming in to cover illness.

Mowing lawns for a living, money is hard to come by. Have had correctional surgery that did not work out well and feel like insurance would be hard to come by. Considered high risk with insurance, cost way too much and provided nothing.

We knew we were going to get health coverage again, not a concern as we will be uninsured for only about a year and do not need to worry about money.

Four kids and work only part time.

Cannot afford to pay for insurance at the moment.

I do not really need insurance, if I started to need it, I would get it.

Out of work and I am barely making it now and I have to help my brother with bills.

His job does not pay enough and health insurance costs are outrageous.

We are on our own and we do not quite believe in insurance.

Cost of putting him on my plan is outrageous.

Health insurance is so expensive and we are currently not working therefore cannot afford it.

Self-employed and barely hanging on by a thread.

Do not have the money.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Do not get sick very often. I do not have a regular doctor.

Doing fine, studying wish list.

Was paying \$100 for high deductible plan that did not feel worth it.

People should be able to do what they want with their own money, and we do not need any more taxes, too many people take advantage of the system.

Between jobs, previously had it through work. Now purchases his own insurance.

Healthy.

Was insured, then had thyroid cancer and insurance became expensive and we could not do it.

Laid off and if I continued COBRA it would have been too expensive.

Economy.

Pre-existing condition.

Things are tight right now and I am perfectly healthy right now.

That is where all my money goes to and I do not have enough to go to dentist or doctor or whatever.

Way I was raised you eat right and exercise, I think insurance is a rip-off.

Cost and deductible is outrageous.

Not affordable, mortgage bills and six kids add up.

Have to buy groceries and make house payments.

My income supports both my mom and me, we sold our ranch and Uncle Sam took most of it and left us with beans.

Rarely gets sick.

Leaving the country.

For the bare necessities, if we have the money we will spend it on the kids' school clothing, necessity at the time.

I get \$545 in Social Security and she does not get any, I cannot afford it.

Cannot afford it thru work.

Make enough to survive on, paycheck to paycheck like everybody else.

We own business and no work and barely getting by.

Work and amount of money I make.

Income.

Do not know if I can get other insurance with Medicaid.

I was unemployed.

No discretionary income left after bills are paid.

No income except unemployment.

Health insurance is so expensive to get on your own. For me it is cheaper to pay for a doctor bill every now and then, than to pay for health insurance every month. I am not sure if we qualify for Medicaid, because of our income. It is something we need but the standards are so low. We both work and I do not think that it is fair that we cannot get it. We are not sitting at home on our butts, but working jobs.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

I would rather pay for things that I need at the time rather than taking a chance on paying for something that may never happen.

Income will not support health insurance.

Have health insurance now, but health insurance is so incredibly expensive.

Happened with the economic down turn. We have had it in the past.

Everything costs too much.

Home business and social security.

Self-employed artist, generally live on just what I make in the summer, and avoid doctors and lawyers.

Income is spotty.

Living on widow's benefits. Laid off from job 2.5 years ago, did COBRA and was covered for 18 months and after that I could not afford the premiums, cannot even afford the medication currently supposed to be taking.

Currently unemployable due to injury.

Makes no sense.

Spend my money on what is really needed, cannot afford it, need to pay other bills, pay check to pay check.

Self-sufficient right now. I am self-pay and that is that.

Work my butt off and I have three kids to pay for. Cannot afford it. Not a lot of high paying jobs here.

Prefer barter system over cash and most of time it works for me.

I have a low paying job and I am currently a single parent.

Too expensive. I am self-employed, for me to get insurance it would be ridiculously expensive.

I had a heart attack in 2004 and I owe \$50,000. I also have diabetes so my medical is sky high and I do not make a whole lot of money.

Hard time finding a job at this time.

Economy, cost of gas, cost of living.

Before I joined the service I had no insurance and I could not afford it. I know a lot of people who cannot even get insurance at all, not even through their work.

Seasonal worker.

Had health insurance but we could not afford it.

Do not have a job but I am healthy.

Food is more important than health insurance; we want to keep food on the table for our kids.

I am a college student and trying to pay for school and also the same with the government situation.

Going to school right now and I do not have adequate income.

Health insurance through work is pretty expensive.

Our income is only set for necessary items.

Cost Situation.

Pre-existing condition and cannot be covered.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Work that I do has turned into seasonal work and it got to the point where I was dipping into my retirement fund to pay for insurance, and I could do better things with it.

All my money goes to rent and life and all of that.

Do not have the finances to buy health insurance for either of us.

Farmers, we do not make any money.

Health insurance is expensive because we are too high risk with medications we take; that is what they tell us.

Healthy at this point, so have chosen to go without.

No work available.

Cannot afford it.

Self-employed and the cheapest we can find is \$250 a month for catastrophic only.

He has been unemployed for a few years.

Have not been sick in years.

Young and no health problems.

Lincoln County, Libby not able to work.

Unemployed do not get much money.

Only work 20 hours a week, only job there is.

Only made \$16000 last year, barely enough to live on.

Low income and single parent, I would put rest of my money towards my children's well-being and shoes rather than health insurance for myself.

Have to feed your family.

Priorities.

Stuck on Medicare, should be eligible according to all she knows but not accepted. Find it hard to pay bills, single mother of two, no reason she should not get government help.

Current economy, looking for another plan, could no longer afford rising premium costs.

Work at a minimum wage job.

Job that just pays minimum wage and cannot afford health insurance.

Like telling a homeless person that he has to buy a house.

Every dime you get goes to surviving and do not even eat properly. That is where a lot of my health problems come from.

Cannot afford high dollar health insurance.

Divorced.

I do not agree with how capital health care is processed and third party payers and I do not have the financial means to pay for health care.

Healthy and the price of insurance is out of control.

Could not afford it.

We are trying to build a house, and we are living worse than people do in prison.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

I only have health insurance because of my job, whereas my husband is healthy and he would rather spend money on other things.

Have to live, money is tight.

No money.

I do not get much money, and I have to support everyone in the home.

Living on unemployment.

Support all five on one income

Mortgage, lights and everything like that, we are way under income and it is a struggle just to keep the lights on and the house paid.

We do not have a high income, and we are in poverty, money we have goes to bills, food, and basic needs.

Income is not the highest just yet. We are hoping that our incomes will generate more money here soon, and we would like to be on health insurance.

Do not have big enough Income to purchase insurance. Husband is unemployed. Works seasonal jobs.

Eating and surviving is more important than worrying about insurance. We live in the moment and buy what we need now.

Cannot get a job or a babysitter and I have to pay for everything.

Large family, family comes first, whatever comes in is needed.

Do not make enough money.

Single man lives by self, quite healthy, go to Indian Health Service if sick.

Food and clothes instead of buying insurance.

Into taking care of my spouse and being happy, we cannot afford it but I would like to have coverage, body falls apart when you are older.

It is important.

Most everyone in the household is covered by Indian Health Service.

Rather do other things and spend our money on other things.

Work for minimum wage, single mom with two kids.

Fill in job, living with parents.

Support myself, my husband and my three boys on my income.

In case something terrible happens.

Self-employed.

Do not have health insurance because it is so expensive.

Applied and denied because of prescriptions.

Husband has cerebral palsy and he has worked all his life and was laid off from his job, he will get some in the near future.

We have had issues with companies refusing us, and they are so expensive and a rip-off.

Living in Montana, living and working outside, it is a short season and income is not as high as I would like, and money gets stretched out thinner than I would like.

I take care of my parents and I do not have the funds to get health insurance right at the moment.

We live in Hamilton.

Been in every situation.

Do not have the money to buy health insurance.

Married to same man three times, my life is not what I want it to be.

Ridiculously expensive. Costs less to just pay for services than for the premiums.

She has Lupus and Fibromyalgia and arthritis and we cannot get health insurance, it is too expensive.

Health insurance costs too much. It would be wiser to save your money in a bank and wait and see if an emergency does happen.

Income.

Just able to support ourselves and any extra money goes to family needs.

Contractor and it is very tough to make ends meet right now.

Laid off, no work.

I am a healthy person and I would rather just pay for it at the time, rather than insurance that prolongs payments. I am a lucky individual.

Only part time employed, work is scarce, preexisting illness, so expensive insurance.

Gut instinct.

Situation with health insurance is that premium costs are too high now. With our age we do not necessarily have to worry as much as we would when we are older. Insurance would not even pay for itself at its current price.

Pay too much in child support right now and I cannot afford health insurance.

Work in construction and raising family trying to care as best can.

Ranchers.

Unemployed human being.

He is working hourly and I am a student and he is the main provider right now.

We choose not to.

He is a self-employed carpenter. Carpenters are not considered professionals and are not paid as professionals. Mortgages and our daughter in college take up our money therefore we cannot afford health care.

Trying to pay for college.

Never got around to it, use to being taken care of.

Economic situation.

Do not have enough work, underemployed.

His job just does not provide enough money.

She pays all the bills.

Have health insurance through Indian Health Services.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Health care is not a big issue, maybe in a couple years I will need it. Maybe would be more responsible to have it soon though.

Lost my job of 17 years about two years ago and there are not a lot of jobs like that in Missoula so I had to go back to school and re-educate myself and I started a new business and I am just starting to get it off the ground. In the process of that I am now losing my house. The money I make is going towards house payments.

When we came to Montana eleven years ago we had to work two jobs to help support my dad. The cost of living is so high here that it is tough. We were able to quit our day jobs, and then we were working part-time now. It is tough, we live payday to payday, and we have no retirement except for the \$700 he gets a month from his past employer.

Cannot afford it but I would love to have it. I am unemployed. I cannot find a job. I have been unemployed for a year and a half.

Too expensive.

She did not get paid enough at her last job.

I do not have enough money and I need to spend my money on rent and bills.

Make too much unearned income, unemployment benefits, so we do not qualify for any insurance, and we cannot afford private insurance.

Cost of everything. Extra health care bill we have now, hard to make ends meet.

Only wage earner in the house, my salary is too low.

Single parent.

High cost and limited coverage, I also have some pre-existing conditions.

On social security, I only get \$930 a month and it takes all the money I have to live.

I have not had any medical problems so I just don't really need it.

Cannot afford it. Own your own business and it is a continual struggle to keep above water. IRS keeps taxes really high. My income is actually 250 percent below poverty level but I own my own business.

I give all my money to Montana, to the city, and the county, and Obama. Not happy with any of it.

Cannot afford it, I have other bills that have to be paid first.

My husband's medicines cost \$5000 a month and we could not afford that without healthcare.

Fixed income, it takes everything I have to exist.

She works two jobs; neither of them offers health insurance. We have a newer car because she has to drive to the second job, so we have those payments. I have health insurance through Medicare. Her pay check is for clothing, food, and transportation mostly, while I fund rent and bills, and utilities.

My widow's benefits make me ineligible.

We are in a recession and there are many unemployed in our country and sometimes health insurance is a luxury.

Cannot afford a policy on my own.

Up to the person.

Unemployed for 4 years. I am disabled and am trying to get disability.

Do not get sick, healthy person and into preventative health care, eat right, take vitamins.

You pay and pay and then claim and then they will not pay, if no insurance you could save money and could pay what you owe. Rack up medical bills and then pay them off improves credit rating.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

His work does not offer insurance, I just started new job with no coverage, last job lost hours and lost insurance plan.

I am a devout Christian and believe that the Lord will take care of my problems.

I had a brain tumor, four surgeries, and was unable to work for so long and had to start slowly to work myself back to a full schedule.

Daughter who is struggling, personal experience.

Lost job and money is tight.

Unemployed school teacher, right now I just substitute, not a steady income.

I am insured through my job and they supplement me about 90%, if I were to insure her through my job it would be \$500 extra a month and we cannot do it.

Self-employed, we have a semi-truck; the cost of everything is too much. I am a stay at home mom. I chose to leave my job.

Unemployed several years ago, I started my own business on the internet selling artwork.

Live pay check to pay check.

Work offers no insurance, and everyone else gets our money.

Live paycheck to paycheck. My big splurge is my television. I do not have a car payment.

My company got bought out and we lost everything.

Do not make enough money.

Not working right now so I have no way to afford insurance.

Both apply to me, make enough money to buy health insurance sometimes, but I am not going to pay for it because it is too expensive.

He is healthy but my policy at work is not affordable enough to cover him.

Get what we provide for everyday living.

Uninsured for a month. Have cancer and have not worked in two years.

Health care coverage through Christian Brotherhood, if I did not have health care I would pursue it.

Going to school, no income.

Cannot afford it.

Cheaper to pay as we go than buy insurance.

Way our expenses are we cannot afford our own insurance.

Not working while on workers compensation.

Too expensive for what I was getting, it was more than my whole paycheck.

He works for a farmer. Farmers do not give out health insurance policies usually.

He had a nasty accident at the beginning of the year so our income was low towards the beginning of the year.

I do not make a lot of money, but I make too much money to qualify for a government program. My husband passed away in September and he did not qualify.

Could not afford it because I was paying for food and housing.

Low paying jobs without further education but beyond high school.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Low income and I am in college.

Economy is tough now; prices are sky-high, spending all money just trying to exist.

Laid off about six months ago and the only one working is my daughter and she is going to school currently.

Things he has to pay, a lot of it is to care for me. Such as personal life, and life with me and he is torn between them.

What health insurance costs, I could get a new vehicle, not using it, waste at this time for the cost.

Income is low.

Do not make enough money.

Full time student and single mother. I would rather not pay for that and we are not sick. Preventative care would be nice.

Insurance is expensive and in today's time those decisions are based on the necessary items rather than insurance.

Cost of living has gone up, cannot afford it.

Debatable.

Low wages and part time seasonal.

Lost my house, went through bankruptcy, starting a new business, and times economically are tough.

Unemployed two different times in past 10 years.

Everybody should be able to have health insurance but not everybody is able to have health insurance.

Healthy and I am just waiting for the right insurance to come around.

Financial reasons, budget.

Insured in the past and laid off, now on limited income.

We have always paid our own way and been responsible for our bills.

I do not have time enough to work a full-time job and get health insurance.

Poor, I thought I was middle class, but I am being weeded out. I do the best I can.

Have to eat and live, have some through Indian Health Services.

Single father.

Healthy.

Economy.

Single mother.

Times are very tough, no money to give to health insurance.

Retired, unwilling to pay 900 dollars to keep his insurance, had to get another job to get health insurance.

We are part of a ministry Christian co-op. We pay to people who have medical needs. If we have a medical need we submit our need. The people in the co-op then help pay with the medical needs. We have had to use it. We pay into the pot and we are healthy so that is what we have decided to do.

I filed for disability in 2009, by the time I get money in I am paying back out for debt.

We live in a community and he is a manager and knows that we are in debt.

Able to afford own and I believe that insurance companies like Medicare, Medicaid and Social Security cost this country a bundle.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Pay the bills.

Currently unemployed, hard on cash and medical debt.

Our bills, we make enough to live the way we live and do not have that much extra, we cannot afford high premiums and deductibles like insurance we previously had, it just was not worth it.

Student at Montana State, going in debt instead of earning money.

Takes everything a person can do to live anymore, to buy groceries, gas.

People who can afford it will buy and those who cannot afford it will rather use their money for things that are needed to live.

Single student mother, I make below the poverty line.

Pretty healthy, I do not go to the doctor much. It is more than I am willing to pay right now.

I do not have a job and I am trying to collect unemployment. When I have a job there are bills to pay. Somehow I could save some money, but it would take a while.

We have a mortgage and car payments and other bills. We cannot afford it right now.

Single mom and I work as much as I can, and I try to pay all my bills, but money is tight.

Had insurance for the past 2 years, but with the cost of gas and everything else going up, and our insurance went up too, we could not afford it.

Our money goes to necessities. It does not go to anything not necessary and if he is not sick we do not go to the doctor.

Without work for 2 years.

Did have health insurance, self-employed, could not afford it anymore, money had to go elsewhere.

Neither applies to me at this time.

I do not make enough money to buy insurance. Previous accidents have raised insurance for me.

He wants to make sure he stays healthy and if he did not have to pay for health insurance than he would not, he would use the money for other things

On Tribal Health.

We live paycheck to paycheck, and have a lot of kids. If we could pay for health insurance, we would.

Money is tight because I am a stay at home mom living off child support.

Single mother, it is hard especially when one of my children is disabled.

Unemployed.

Laid off on January 1, 2011. Could not find a job, then had cancer surgery. Paying off bills. Cannot find another job with my recovery. Husband lost his job went back to school and covered by student health insurance. I found a job working part time but when a single part time job is the family's only income you just cannot afford to do anything but what is necessary.

I am a single mother of 2, expensive, work to pay bills.

Before I had my job I never worked for a place that could and so I just worked to pay my bills.

I have no extra money because I am buying gas, food, clothing bills.

Young and healthy, waiting for health insurance at job to kick in.

Low paying jobs and they barely cover the bills.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

No money.

Life is expensive.

Cost is too high.

Strictly a financial situation. Cannot afford to. Both self-employed and do not have the income to get insurance.

Both true, everyone has to pay to live, little left over for health insurance. If you are healthy, no need. Costs too much money for insurance.

Unemployed.

Do not want money from government, want to support family on own.

Health coverage is overpriced, so people cannot afford it.

Would like insurance but cannot afford it.

Money is short, need to spend it on food and shelter.

Two disabled children and everything goes for them.

Disability, unable to work.

Started own business and he is in construction, economy took a downfall.

Had health insurance before. I am working 2 jobs and one offers insurance but I need to work more hours. The other job I have to pay over \$200 dollars a month for insurance. My boss discouraged me saying that I would not make enough money or hours. Smaller companies employers have to pay a larger premium than larger companies and that is the sad reality of insurance.

She has a lot of responsibilities and cannot afford health care right now.

Live in a small town where there is no work.

Economy.

We live on the reservation and have Indian Health Service.

He is retired and cannot afford.

Mother and only one working.

No money left after necessities.

Unemployed since 2007.

Too many bills.

Single parent and a dead dad and working part time.

On Social Security

Neither apply; she was turned down because had not lived in U.S. long enough.

We have such a large family and we do not have the extra money for insurance.

I was in a head-on wreck and destroyed my back. I had to go on disability. I was a nurse and Doctor said I could no longer be a nurse. So now I am on a fixed income.

Lack of income.

Economy, my age, the cost.

Cannot afford insurance, it is too high, costly.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

We live in rural Montana and not many positions available, underemployed, income they earn goes to necessities.

High cost is main reason we do not have insurance.

I got divorced, financial challenges including my job.

We decided it would be cheaper to pay out of pocket at the moment than it would be to buy health insurance.

Economy made it impossible to afford.

Where we live, and income, pay rent, utilities, and water. Struggling from paycheck to paycheck. Do not like town and it is 35 miles away and no store where we are at.

Choose not to have health insurance because it costs too much for what it is.

Truck drivers, own our own business, we could afford reasonable health insurance, if it would cover what we need at our age.

Over income for Medicaid, gas is high, I have a lot of bills and utilities I just do not have enough money after I am done paying bills. I have about \$300 dollars after bills that I have to use for food.

Premiums are too high and the deductibles are also too high.

Home, food and insurance and taxes take all our money, there is no extra.

Low pay work as ranch hand and school.

Too expensive.

He lost his job in November 2010, he carried health insurance, I do not have health insurance through my work, we were living on just my income and we were lucky to just pay the electric bill.

Would pay for it, cannot afford it, and have to pay bills.

Economic Situation.

No money left over to get insurance.

Majority of the money goes to food and bills.

Tough times at the moment.

Need food, clothes, and shelter before you would need other things.

Only been at my job a limited amount of time and they are not going to provide insurance just yet.

We are poor.

I do not make enough money to put towards anything extra like health insurance.

I am a single mom that does not make a lot of money and I have a lot of hospital bills and I do not have enough money to get my kid diapers every month.

We live paycheck to paycheck.

Business is slow with the economics, we will when we can.

Work day by day and do not know if we are working one week or not, it depends on what our job says.

Been very healthy, very discretionary income.

Healthy and want to spend my money on other things. Cost of insurance is greater than how often I would use the coverage.

Cannot find insurance.

On Medicaid.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Really low-income.

Wages.

Single parent.

Past health problems, if there is some way to get us both coverage that would be wonderful.

We do not have a lot of money left over after monthly payments.

I do not have a job; I just work odd jobs I can find.

I'm in private practice; it's just that the economy has been bad for a long time.

Limited income.

Own business and no income yet.

Laid-off at the moment.

I know too many people with health insurance with huge bills. Insurance companies are thieves. I do not mind spending the money to a doctor or a hospital. Insurance companies are a bunch of crooks.

Currently unemployed

Jobs are not very high paying.

If affordable and within needs we would like to buy it.

We do not have money to spend on health insurance. There is nothing out there at our age. It is not affordable.

Do not make enough to afford it.

Expense of living. My skill level in the job world.

I do not get enough money as I am on Social Security as it is. I run out of food before the end of the month.

Cannot pull it out of budget.

Economy, we own our own business and barely pay the bills and provide for needs, and we get help from family and Healthy Montana Kids and different programs. There were other times with our business where we had enough money where we bought our own health insurance.

I want to spend my money on other things.

Financial reason, not being able to get health insurance to fit budget.

Had health insurance, but we could no longer afford it after Obamas health plan came into play.

No work.

Not a one size fit all issue.

Lost my husband to cancer and I am paying off his bills right now.

Our own business. Customers do not pay bills. Every year insurance would go up \$100.00 a year and we never got any better benefits. Sometimes we had to pay employees and not ourselves, and our house payments and cost of medication on top of everything else.

Income is way too low to afford health insurance.

Bills, day-care, car payments, rent, food, student loans.

Mainly employment now, lack of.

Minimum wage job, cannot afford.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Single mother and I need my money for my children.

Cost too high.

Got myself into a financial situation, used credit cards too much, and have to get them paid off. Work as a waitress so does not make much money.

Only make money during farming season.

Money.

We have seven kids at home. We home school our kids and I go to school. Especially when you have a house payment that is half of your income.

Cannot afford the astronomical premiums. Used to have coverage, very healthy person. Cannot afford it though, even major medical plan.

I do not have an education, because I stayed at home to raise my children.

We are like most people in Montana and we try to stay ahead of the bills so we can stay ahead.

New business owner, no extra money.

Laid off and I am living off my savings right now.

I pastor a small church and finances are just not there.

Cannot afford insurance, has other bills, economy is down.

Range of demographics, if you are young and healthy, you do not need it and if you are poor, then you cannot have it.

He has many health issues but does not have a job to pay for insurance.

Cost of health insurance is high for people of my age group.

He was laid off and started at a tire store with a yearlong period before becoming eligible.

No extra money to spend on health insurance. Told by Medicaid not eligible because too much money in savings.

On SSI disability.

Cannot afford it.

Not working and all my money goes to my survival.

Full time student, I have little other time to work.

Cannot get insurance on my wage of \$500 a month.

Wendy's is only job he could find, makes minimum wage and no insurance benefit.

I should really have health insurance, I am getting too old, I used to have it through my old job, but I just have not had it the last two years.

Healthy and I prefer non-medical type medicine.

Working part time and they say I make too much money.

Single mother of three with minimum wage part time job.

Cannot afford to do it.

Economy, we do not make a lot of money and cannot afford it right now.

Tough situation, prices go up and paychecks do not, taxes and property insurance too expensive.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

Do want health insurance, so neither statement makes sense.

Generally we do not need a lot of health care. The types of care we get from insurance companies do not cover the things we need. We prefer alternative medicine. The money that goes to the insurance goes to them and not the people that really need it. They ask too much money for insurance that we have never used in over ten years. They take advantage of people like that through their high costs.

Health insurance is too expensive.

Insurance is too expensive and we want to spend it on other things.

We both work dead end jobs.

Choice to be made.

Any medical care is way too expensive right now.

Both unemployed and my husband were in an accident and there is not any work here and my son is a full time student.

Funds were not available at that time, he did not have insurance.

Economy and our budget.

I am a carpenter and work is really thin.

Money is tight, have necessary bills.

Both employed under the same employer four years ago, they went out of business and we both lost our jobs. We live in a county with a high unemployment rate. I just got health insurance but we have not had health insurance for the last 15 years.

Could not get high paying job, all money goes toward bills.

Take care of family or other things to live.

Self-employed in construction, no work in this economy.

No tax or tariff on the Chinese items we consume. Our income is diverted to another country.

Do not make a whole lot of money and health care options are very expensive.

Rather have food, cloths, and housing than insurance.

Unemployed; cannot afford anything.

Paycheck to paycheck.

We are not depending on the Government.

Bills do not leave anything.

Retired so we do not get insurance anymore, it ended and now we just do not have any. We have looked into it.

Lake county takes everything I have in property taxes.

We have enough bills to pay, health insurance.

Unemployed right now. I am self-employed but do not have any work through that either. Lack of work.

He works on a ranch and only makes \$1800 a month, there is just not a lot left over.

I am a full time student and we are on a fixed income.

Uninsurable, would be able to pay for health insurance but cannot find it.

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

This is the first job that I have had that provided insurance, before it was too expensive to get insurance independently.

She needs health insurance

He does not make much money.

I have been in that position before.

Economy right now, not a lot of work, and I am finalizing a divorce right now and my income is not enough.

Only have a part-time job that only pays minimum wage.

Lost my job in 2009 and I was on unemployment for a while, I applied for disability and it will be two years before I am approved. We barely make enough to make ends meet. I have a lot of medical issues and I wish I had it, and I try not to go to the doctor if I can help it.

Work full time, disabled, do not make very much money, no health care, every payday need to decide how to spend money.

Could possibly make it happen but not willing to pay high price.

Money I have goes to bills.

Health insurance too expensive.

Insurance is just too high cost and economy bad.

We are getting health insurance starting in January through Medicare.

Some people cannot pay for health insurance and are forced to use the money they do have on necessary items to live.

Ranchers and she is bus driver for small school, at poverty level.

We live in Lincoln County and there is no work here.

Had medical issues lately and it is not easy when I can hardly pay my bills.

Rarely ever sick. I take care of myself as much as possible at home with herbs and natural things. I do not agree with the way hospitals and pharmacies force people into things, may not be right for them.

Living day to day, dollar to dollar.

Can't Afford It.

Not enough money to go around.

Choose it, doing it.

Economic Situation.

Rather spend it on other things. Insurance is a racket anyways.

Economically, not enough wages to afford luxury like health insurance.

Excess of 20 dollars a month or have to rip into my savings.

Healthy family, simply healthy

Fairly good health and would rather spend my money on other things. If I had employer paid health insurance I would take it but I do not, I am self-employed.

We might lose our house and we cannot keep up with all the bills and afford the insurance as well.

We are on a fixed income

2011 MONTANA HOUSEHOLD HEALTH INSURANCE SURVEY SUMMARY TABLES

I just started my own business, time and money are sparse.

Unemployed and I have little income and what I do have is buying my food and shelter.

Independent self-employer. Do not have enough money to cover health insurance, only enough to cover my bills.

Low income and employer does not provide insurance.

Can afford to pay out of pocket, do not get sick often.

Pay what we need first then if have left over fun.

We are just really slow and there is no extra money for that.

Insurance is way too expensive.

Single mom.

He believes people are responsible for their own care unless they are in dire need.

Things are getting pretty tight. Might not be money for anything but necessities.

I have cancer.

Coverage just ran out at the first of the month from parents and has not got around to looking for a new plan.
