

# **Usability of Montana PCMH 2014 Quality of Care and Utilization Data**

---

**Presentation at the Patient-Centered Medical Home  
Stakeholder Council Meeting  
Helena, Montana**

**May 20, 2015**

---

Nancy McCall, Sc.D. • Juliet Rubini, R.N. • Kristin Geonnotti •  
Brianna Sullivan, B.A.

---

# Evaluation of Guidance

---

- **Evaluated fidelity to PQRS and CHIPRA specifications**
  - Identified inconsistencies that might lead to differences in reporting across PCMHs
  - **Minor differences between guidance and PQRS specifications for blood pressure control and A1c**
    - Greater specificity in PQRS for all three measures
  - **Major difference for tobacco cessation and intervention**
    - Denominator included only users versus all adults with clinic visits
    - Numerator includes only patients who received intervention versus patients screened for tobacco use *and* users who received intervention
  - **Differences in childhood immunization relative to CHIPRA**
    - No numerator or denominator definition in NIS
    - Refusals/contraindications in denominator versus not in denominator
    - Montana guidance excluded seasonal flu and 2-dose Rotavirus
