CSI asked the three of the four payors in the program that were in attendance to comment on how the 2016 reporting cycle went for them in regard to both the utilization measures and the narrative annual reports. Medicaid, Allegiance, and BCBS all commented that the reporting went well and they didn't run into any problems. The payors agreed that no changes need to be made to the utilization measure reporting guidance for the next reporting cycle in 2017. Medicaid recommended one change be made to the annual reporting form: a "yes" and "no" need to be added as options after question four instead of just the text box to explain. CSI staff said they will make the change.

The subcommittee will not plan to meet again until the fall to do one more review of the guidance before finalizing it for 2017.
