The primary agenda item was to review and approve the 2016 draft Payor Annual Report template.

Dr. Weisul stated that the template should have been reviewed and approved by the payor subcommittee before being brought to the stakeholder council last month. The payor subcommittee will get first review of future documents.

Cathy asked the payors to share overall comments on the document or on specific questions. Dr. Weisul said it is difficult to describe future plans and he's uneasy about putting some of his ideas into writing. It was suggested that if a payor prefers, they can simply answer a question with a statement such as "not prepared to share that information". Clarifying language will be added to the template introduction stating that payors are not required to answer all questions.

Mary LeMieux reviewed her suggested edits from the November stakeholder council meeting:

1. Separate question #3 into 2 questions;
2. Add a question about *What barriers to PCMH development?*

Christina called for a motion. Dr. Weisul moved and Dr. Griffin seconded a motion to approve the Payor Annual Report template as amended for recommendation to the council. The motion passed unanimously.
