

## NEW for Health, Life & Disability, Property Casualty and RRG Insurers

1. Changes have been made to reports you may have filed in the past:

The Small Employer Group Activity Report, Funeral Insurance Activity Report, and Medical Malpractice Liability Experience Report are no longer required.

The Genetics Program Charge Calculation and the Report of Insured Montana Residents are now schedules on the applicable premium tax returns.

Because all reports are either obsolete or incorporated into the premium tax returns, there are no longer supplemental form spreadsheets that must be completed and filed with the tax returns.

2. For companies subject to the Montana Fire Tax, you will notice on the premium tax return that some allocation rates have been reduced to zero percent.
